

Find your climbing shoe size

- 1 Print the template scale page at 100% scale without changing or adjusting the size (A4). To be sure, place a credit card in the box. If it matches, it means the size is correct
- 2 Cut out the insole that you consider your size and insert it into your climbing shoe that you usually use
- 3 When your insole fits correctly, that will be your size for your new Tulson Tolf climbing shoes
